Projects

January 2024 - February 2024

Portfolio Website [Link](#) || [GitHub Link](#)

A personal portfolio website showcasing my frontend development skills and projects.

- Features interactive project showcase, smooth navigation, and a contact form.
- Optimized for performance and accessibility across multiple devices.
- **Technologies:** JavaScript, HTML, CSS.

October 2024 - Present

E-Commerce Website

Developing a responsive e-commerce web application using the MERN stack.

- Features include user authentication, product search and filter, shopping cart, and payment integration.
- Implementing an admin dashboard for product and order management.
- **Technologies:** MongoDB, Express.js, React.js, Node.js, Redux.

August 2023- September 2024

Weather App [Link](#) || [Github Link](#)

A React-based weather application that retrieves real-time weather information using the OpenWeatherMap API. Designed with responsive UI using Tailwind CSS to provide a seamless experience across devices.

- Implemented a location-based weather search and forecast display.
- Integrated with external APIs to fetch and display real-time weather data.
- **Technologies:** React, Tailwind CSS, JavaScript, OpenWeatherMap API, HTML, CSS.

Certifications

April 2024 - Present

Ducat - MERN Stack

- Training on Full MERN Stack and Deployment.

Oct 2023 - Nov 2023

Softpro India (SPi)

- Training on Frontend Web Development.
